

*60+ Years of Hydronic Expertise Transformed into Liquid Cooling.*

All Stainless Steel construction with exceptional corrosion resistance and ability to withstand temperature variations.

Durable design, perfect for liquid-cooled server racks.

Minimal maintenance requirements and compatibility with all stainless steel piped systems.

## Stainless Steel Filter

- 25 or 50 microns to maintain water purity
- Tri-clamp connections compatible with all stainless steel piped systems

## Stainless Steel Flange Valve

- Industry's Only 100% Stainless Steel Construction
- Choice of Port Options: PT's or Plugs
- Multiple Flowrates & PSIDs Available
- Flow Capacity: Up to 2100 GPM

## Triclover Series

- Maintains constant flow in hydronic cooling systems
- Tri-clamp connections compatible with all stainless steel piped systems
